

FCS Racing Simulation announces Name Change

NIEUW-VENNEP - May 9 2006 - FCS Racing Simulation b.v., a leader in high-end interactive simulation solutions, announced today that it has changed its name to Cruden b.v.

The new name will represent the parent company to Cruden's existing businesses and undisclosed "new additions to the company portfolio". The new holding company structure will be effective immediately, together with the newly established subsidiaries being introduced specifically for Engineering products, Entertainment products and Consultancy and System integration services.

"We accomplished what we set out to do - to build an independent company with a clear focus on the delivery of simulation solutions in both the industrial and entertainment markets" said Maarten M. van Donselaar, the CEO at Cruden. "I'm excited to steer this company into wider seas, knowing that we can continue to rely on Moog FCS as our strategic technology partner", Maarten continued.

Over the past few months, the Company has completed the transformation from a joint venture to a fully functioning engineering company with a new office in Nieuw-Vennep. Its newly appointed management team brings a strong record of success in the automotive and entertainment industries.

Cruden b.v. was founded in February 2004 and is headquartered in Nieuw-Vennep, The Netherlands. The company develops, builds, and markets turn key interactive vehicle simulators worldwide for the automotive and out of home entertainment markets.

Cruden b.v. markets its products under the Hexatech™ brand. Cruden's homepage is www.cruden.com. The Hexatech branded website for the entertainment industry is www.hexatechracing.com
